

SHENZHEN, China, Sept. 29, 2013 /PRNewswire/ -- Huntkey Enterprise Group, one of the top ICT (Information and Communications Technology) manufacturers will unveil its innovative products at GITEX 2013 in Dubai under the theme of "Empowering, Connecting, Entertaining."

GITEX TECHNOLOGY WEEK (20-24 October 2013) is at the forefront of industry integration and leadership. Heralded as one of the largest and most important ICT events around the globe, GITEX delivers a leading platform for ICT professionals from around the world to meet and review a phenomenal showcase of leading technology brands, experience a host of interactive features and engage with industry leaders. At the forefront of the region's ICT development, GITEX is a pivotal event for over 3,500 international and regional exhibitors each year.

At GITEX this year, we look forward to seeing you at the Huntkey stand SR-M15, Sheikh Rashid Hall

where Huntkey is showcasing its entire ICT solutions for a variety of products under the Consumer Technology sector, including Power Supplies, Adapters, Power Strips, Power Banks, Chargers, MFI Cables, PIO as well as household appliances. Besides, Huntkey will also shed light on some of its latest additions to the product portfolio, including the ultrabook adapter with the industry's latest outlook, the world's smallest notebook car charger X-MAN 90W Laptop Car Charger, Stereo and TV power Strips PIO. The application of Wireless Charging LED Light won a number of media prizes, which will also be addressed during the event.

As a well-known power supply provider, Huntkey will never let you down. After a rigorous testings, Huntkey has announced that all of its PSUs have been certified to run Intel's 4th Generation Core Processors Haswell. At GITEX 2013, Huntkey will consolidate its leading position in this area and surprise customers with its latest Green Power EN Series power supplies. GreenPower EN series is silent steady efficient, and ideal for mainstream and basic computing systems. Built with quality components and dual +12V outputs, fit to handle demands of high power requirements, the efficiency can reach 80% at typical load. It uses a 120mm intelligent fan which can reduce fan speed and lower noise.

Welcome to visit Huntkey at GITEX 2013, Dubai!

Date: Oct. 20 – 24, 2013. Booth No.: SR-M15, Sheikh Rashid Hall, Dubai World Trade Centre.
