

KeyPoint Technologies To Speak At TC3 Summit

Written by Australian Business

SAN JOSE, Calif., Sept. 12, 2013 /PRNewswire/ -- KeyPoint Technologies, [a world leader in user interface technology](#), today announced that Sanjiv Sharma, vice president of sales Americas and Europe, will be a speaker at [The Telecom Council of Silicon Valley's TC3 Summit](#). Sharma will speak on behalf of KeyPoint Technologies' line of [Adaptxt® branded keyboard apps](#) for smartphones, tablets and devices.

Sanjiv Sharma will focus his presentation on Adaptxt's extensive suite of functions, including keystroke saving techniques, context based predictions, social connectivity and more. He will also touch on KeyPoint's proven extensibility in the marketplace and strong global language coverage.

"Our team is thrilled to speak and demo at TC3," said Ronald Brown, vice president of marketing at KeyPoint Technologies. "As an active member of The Telecom Council of Silicon Valley, it's nice to contribute to a top tier industry event that aligns with our goal to dramatically improve the mobile and tablet user experience using targeted text input solutions."

Adaptxt replaces users keyboards enabling them to interact daily with their apps, emails and text messages with a keyboard that is practical, personalized and engaging.

With the latest KeyPoint innovations, users can download uniquely personalized Adaptxt keyboards that range from university centric themes to business specific dictionaries that help users message more efficiently. Adaptxt branded keyboards are available in 81 languages for consumers, 94 languages for OEM partners and supports the greatest number of languages on [Google Play](#).

About ADAPTXT, a KeyPoint Technologies Innovation

ADAPTXT dramatically improves people's ability to quickly input their ideas, words and commands into Android devices of all kinds. Using the latest advances in linguistic science and artificial intelligence to anticipate users' meaning, ADAPTXT's smart keyboard applications make human/machine interaction dramatically more enjoyable, personal and accurate. Developed by KeyPoint Technologies, Ltd., ADAPTXT branded keyboards represent the leading use of predictive computer input technology in the market today. Founded in 2004, KeyPoint Technologies is headquartered in Glasgow, Scotland, with additional offices in India, China

,
Japan

and the U.S. The company is a trusted partner for OEMs, platform providers and developers. KeyPoint Technologies is privately owned.
