

FOLSOM, CA, Sept. 24, 2013 /PRNewswire/ - Anything Technologies Media, Inc. (OTC.PK: EXMT) today announced that the company is in negotiation with a buyout offer and joint venture partner of one of its subsidiaries in the Medical Marijuana business space. The company has received an offer for a potential buyout of one of its subsidiaries and is reviewing the contract offer at this time. The company looks to announce the details of this exciting news within 30 days.

Last week the company announced that it had sold its first 100 EMC-5000 Systems and has received a lot of attention and inquires about the systems from potential business partners and clients interested in the system. The company owns R-Quest Hydroponics Inc., which manufactures the EMC-5000 system. The EMC-5000 System is available for sale. Additional information on the EMC-5000 can be found on [www.r-questhydro.com](http://www.r-questhydro.com).

**Anything Technologies Media Inc.**, [www.anythingtechnologiesmedia.com](http://www.anythingtechnologiesmedia.com), is a Multi-Media Digital applications, production and marketing Company. ATM will be the parent company of subsidiary Corporations, each with their own professional management team with extensive backgrounds in finance, new technologies, manufacturing, marketing and distribution. ATM's goal is to combine the expertise of our team members to create a cohesive force, which will carry the company forward in the marketplace to a preeminent position through revenue sharing and acquisitions.

**R-Quest Hydroponics, Inc.**, is a Hardware and Software Manufacturing Company with its headquarters in Placerville, California. R-Quest Hydroponics, Inc has developed the new Environmental Master Controller EMC-5000 system, which is able to provide constant management for grow room facilities for indoor gardens. The EMC-5000 was developed so that growers can rest easy with the confidence that their crop is in excellent hands. The EMC-5000 is able to regulate and control all aspects of an indoor grow system, including Light cycles to optimize growth, Fans, Nutrient pumps, and CO2 level controls to help manage grow rooms. To see more information on the EMC-5000 go to [www.r-questhydro.com](http://www.r-questhydro.com).
