

AUSTIN, Texas, Sept. 12, 2013 /PRNewswire/ -- Tornillo Independent School District, 35 miles southeast of El Paso, Texas recently signed a contract with Prologic Technology Systems, Inc. to upgrade their four district campuses to TEAMS™ cloud-based Finance and Payroll/Human Resource (HR) technology.

"We're seeing many school districts with on-premise infrastructure that has reached its end-of-life and requires a significant capital investment in order to bring it up to today's standards," stated Jim Pepper, President of Prologic Technology Systems. "TEAMS cloud-based solution delivers a more affordable option for increased capability, on-demand scalability and reliability," added Pepper. "The other great advantage of a managed solution is that you have continuous backup and recovery data readily available," concluded Pepper.

TEAMS cloud-based finance and student solutions allow districts the convenience of a single vendor covering everything from infrastructure and software support to daily back-ups and software updates. It also offers an ideal solution for high growth districts that want to match internal costs against fluctuating business conditions.

"Our district is continuously looking to replace stand-alone systems with cloud solutions because of all the advantages it offers ranging from any-time, anywhere accessibility to removing the burden of in-house system maintenance," stated Carlos Garcia, Information Technology Manager at Tornillo ISD. "Upgrading to TEAMS will give us real-time global access and more automated workflows that could potentially eliminate many of the paper-trail processes and redundant data entries that are currently taking place, particularly in HR and accounts payable," concluded Garcia. "Our decision to go with TEAMS was based on several key drivers including: overall functionality, paperless workflows, interdepartmental module integration and area school district support," concluded Garcia.

About Prologic Technology Systems, Inc.

Prologic is the first advanced technology solution for K-12 school district administration and student management. Prologic's Total Education Administrative Management Solution (TEAMS ERP™) seamlessly bridges the silos of finance, human resource and student information into a single, cohesive database capable of real-time reporting and simplified collaboration among district teachers, students, administrators and parents. TEAMS ERP is ideal for school districts requiring a robust, yet easy-to-use system that is highly scalable and configurable. Prologic has been solely focused on delivering intelligent software solutions to the K-12 market since 1992. The company is headquartered in Austin, Texas.
