

The Warrington Website Just Got a Makeover!

Written by Australian Business

PHILADELPHIA, PA, September 20, 2013 **/24-7PressRelease/** -- The elegant yet contemporary site design reflects the numerous renovations that are complete and have greatly upgraded the catering hall. New windows have filled the Arbor Room with light, creating refined ambience for cocktail hours, corporate events, or any other event. Other renovations include completely refurbished ballrooms, cocktail, and bridal rooms and brand new modern men and women's bathrooms on the main level. Significant upgrades have also been added to the property, including exquisite landscaping, picturesque gardens, newly paved parking lot, and a stylish new sign to welcome our guests.

Many of the features that The Warrington Country Club is known for will remain, such as delicious food and exceptional customer service. The executive chef, David Harley, specializes in the perfect fusion of color, taste, and presentation – that is boldly displayed at every event at the Warrington.

The website was designed and built by IQnection, a Doylestown-based web design, marketing and hosting firm.

Some of the features on our new website include the "Virtual Tour" page which provides a picture slideshow of the property and a view of each of the rooms. Our, "What Our Customers Are Saying" page which shares reviews from real customers, and our "Request a Date" page with a form to be filled out and reviewed by one of our experienced event planners.
