

LOS ANGELES, CA, August 30, 2013 **/24-7PressRelease/** -- Hard-to-clean teeth such as those that are crowded, gapped or crooked can be more prone to decay and gum disease. Misaligned bites can put excessive pressure on the joints of the jaw as well as the teeth, which increases the risk for TMJ disorders and tooth damage.

[Los Angeles dentist](#)

, Dr. Poneh Ghasri, offers free Invisalign consultations that can help patients determine if the revolutionary orthodontic treatment is right for them.

Invisalign is a discreet orthodontic solution that uses clear plastic aligners to align teeth. It can be used to treat many different orthodontic problems, including crossbite, underbite, overbite, gapped teeth, crooked teeth and crowded teeth. Unlike metal braces, Invisalign is smooth and unlikely to irritate the delicate soft tissues of the mouth. Aligners can be removed for comfortable eating and thorough cleaning. Patients do not need to change their diets during treatment, and they can often keep their teeth cleaner and healthier. Dr. Ghasri, [Los Angeles Invisalign](#)

provider, can use Invisalign to improve the health and beauty of her patients' smiles. Invisalign is most appropriate for older teens and adults who are able to comply with the treatment recommendations.

Los Angeles dentist, Dr. Ghasri, offers a range of other treatments as well. Lumineers, porcelain veneers, teeth whitening and dental implants can all be used to restore a smile's health and beauty. Candidates for smile makeovers may benefit from one or more treatments that are specially combined to create the desired results. A comprehensive smile analysis can help Dr. Ghasri, [Los Angeles porcelain veneers](#) expert, better understand each patient's needs and goals and identify the appropriate treatments and procedures.

About Dr. Ghasri, [Cosmetic Dentist Los Angeles](#)
