

SPRINGFIELD, MA, October 04, 2013 /24-7PressRelease/ -- MTI Systems, Inc. (www.mtisystems.com

) announced today that McNally Industries, LLC, of Greenwood Village, CO has seen a significant improvement in their cost estimating process since implementing their [Costimator cost estimating software](#) in January of 2011.

McNally Industries, LLC., is a full-service manufacturer that provides product design, testing and build-to-print manufacturing services. Best known for their work with the US Department of Defense, they're also the world's largest contractor for hydro-mechanical and electro-mechanical systems, specializing in precision-machined components for defense and aerospace applications.

"Prior to implementing Costimator, almost all of our cost estimating was done by people with a little experience using spreadsheets," says Nick Phernetton, Business Development & Estimating Manager at McNally Industries, LLC. "Basically, we ended up with inconsistencies in our estimating - which meant we'd get bogged down in the quoting process. It was a huge deal for us because when you're in an industry like ours, opportunities come and go quickly and you need to be able to meet demands as quickly and accurately as possible. Now Costimator offers us a significant advantage over our competition."

For more information, read their Case study - "[Effective Cost Estimating Software: About McNally Industries, LLC.](#)"

About Costimator Costimator cost estimating, [quoting](#) , and process planning software began development in 1982. Originally designed for suppliers, it reduces estimating time, while not compromising accuracy or consistency for manufacturers who do machining, fabrication and mechanical assembly. The cost estimating software system calculates cycle times and the cost of manufacturing a part or assembly based on the capabilities of the suppliers' equipment and their shop rates.

In recent years, many more manufacturing processes have been added to Costimator helping estimators meet the needs of new technology suppliers and OEMs in industries such as, aerospace, agriculture, defense, electronics, medical, heavy truck, energy, transportation, and construction manufacturers.

Costimator Makes Significant Improvements to McNally Industries, LLC Cost Estimating Process
