About the Free Books Program

This program from the Canadian Center of Science and Education is offered by the organization's library. Through the Free Books program, research based libraries in developing countries can get their hands on a number of valuable resources for free. The CCSE will even pay for delivery. However, you should complete and submit the application form to service@ccsenet.org.

Applications will be processed and books will be sent on first come, first serve basis.

What Books Are Available

If the Free Books program intrigues you, you should first check a list of the available books through the Library page. There, you can download a document listing each book's name, description, status, availability and recipient. The recipient column is a very helpful addition on CCSE's behalf; even if you don't get the resource you need, you can contact its recipient and request for it.

Currently, CCSE has over 30 publications which cover a number of fields like finance, health, marketing, art, retail and politics. Some titles that are available by the time of this article's publication are:
