

NIAGARA FALLS, NY, November 11, 2013 **/24-7PressRelease/** -- Ensil's solid performance for repair, rework and refurbishment of critical equipment for The United States Marine Corps (USMC) was superior to other competitive proposals submitted by high pedigreed organizations including the Original Equipment Manufacturers (OEMs).

Farsad Kiani, President and CEO of Ensil Technical Services Inc. made this announcement today: "Ensil continues to be dedicated to providing United States Department of Defense Agencies with the best value, most cutting-edge technology, blended with superb technical support. Ensil's customers are voting for Ensil's technical ability and its superb customer service by awarding these contracts to Ensil which are purely a reflection of the fact that we at Ensil are hitting the mark by award of these contracts for being able to meet customers requirements every time as expected."

Ensil is proud to be a partner and an electronics repair support for Warner Robins AFB, Tinker AFB, Norfolk Naval Shipyard, Spawar, Navsea, Tobyhana, Eglin, Folt Belvoir, DLA, Army Materiel Command, Naval Underwater Warfare Center, Camp Lejeune, Camp Pendleton, Anniston Army Depot, Davis Monthan AFB, Fort Hood, Hanscom AFB, Lackland AFB, Letterkenny Army Depot, USMC Albany, Hill AFB, USMC Barstow and Crane Naval Support Center.

For nearly three decades Ensil has been a technical services and solution provider for Air Force, Naval, Coast Guard Vessels, Ship Yards, almost every military base and all Commands of the US Armed Forces and our allies.

Ensil Technical Services Inc. is a supplier of equipment and solutions for Military Communications, Command & Control, Electronic Warfare, Electronics Circuit Boards, systems and subassemblies. Ensil's repair and rework services including its integrated design to production expertise are ideally suited for Land, Air and Sea based Defence Electronics Systems and Sub-Systems.

Ensil provides services from two locations, a facility in Niagara Falls, New York, and a facility in Markham, Ontario, Canada. As a partner and a member of the Aerospace and defense community Ensil continues to provide engineering innovations and excellence to the United States and Canadian Armed forces. Ensil is an electronics repair, rework, refurbishing and service provider for IFF F-4, F-5, F-15, F-16, F-18, C-130, CH-46, CH-47, M1 Abrams, M60, LAV, Stryker, AEGIS platforms.
