

SARASOTA, FL, December 04, 2013 /**24-7PressRelease**/ -- Alumabridge, LLC produces aluminum bridge decking that has revolutionized highway bridge construction and repair. Fabricated via proprietary extrusion and welding technologies, the decking allows deteriorating bridges to be repaired at a fraction of their replacement cost. The first bridge deck was installed from crane-to-bearings in just 30 minutes! A pilot bridge in Quebec has been awarded and will be installed in 2014.

Florida Gulfshore Capital invests in promising early stage companies and small to mid-market growth opportunities. Based in Naples, Florida, FGC looks to back talented entrepreneurs with a history of successfully building and exiting high growth companies.
