

MONTVALE, NJ, December 08, 2013 **/24-7PressRelease/** -- DATA Inc., a globally recognized information technology software and service provider, will release the results of its "IT Decision 2013" information technology survey during a webinar scheduled for Wednesday, Dec. 11, the company announced today.

The survey, conducted September through early November, includes responses from a wide range of IT professionals such as CIOs, senior IT directors, project directors and programmers. Participants were surveyed on a variety of topics including IT spending, employment, and technology directions in 2013. They were also asked their perspective on expected trends in 2014. The survey is the second annual for DATA Inc.

"This year's survey will once again provide insight into trends in information technology, spending and skills in 2013," said Ashis Bhisey, vice president of technology for DATA Inc. "We look forward to reviewing survey findings that indicate where IT professionals believe the technology is headed in 2014."

Joining Bhisey on the webinar will be several members of DATA Inc's executive team including Conrad Leao, vice president of operations, and Susan Leicht, senior account executive. The panel will be moderated by George Nikanorov, DATA Inc.'s head of marketing.

DATA Inc.'s executive team will review the survey's findings, and put them in context of the current IT environment, as well as the political and economic climate throughout 2013.

The webinar will begin at 1 p.m. on Dec. 11, and is free. Information technology executives and professionals are invited to attend. Registration can be found at <http://www.datainc.biz/2013-it-survey-webinar.asp>. Webinar attendees will be the first to receive the DATA Inc's 2013 IT Survey's full report.
