

MONTREAL, QC, January 21, 2014 **/24-7PressRelease/** -- Diabsolut announces two associated milestones to kick off 2014: the launch of its Center of Innovation and the hiring of David Wilder. David, previously Director of IT at leading Canadian Telecommunications company [Bell Canada](#), will head the new leading-edge division.

Diabsolut's Center of Innovation was created in response to client feedback that current industry solutions offered are unable to fully meet their operational demands. The Center of Innovation will be fully dedicated to the development of progressive business concepts and solutions, which will enhance Diabsolut's existing core [Strategy](#), [Operations](#) and [Technology](#) services.

Joe Diab, President & CEO of Diabsolut Inc., stated "Diabsolut prides itself on being open minded and at the forefront of technology; the Center of Innovation will permit Diabsolut to continue its remarkable growth with a concrete approach to starting different practice areas, as well as developing innovative tools and offerings. Pairing strong client relationships, and extremely talented resources, we are taking the ideas generated by our employees in response to customer demand and are making them a reality."

David Wilder brings 35 years of experience within the [Telecommunications](#) industry, including 20 years of experience within Information Technology. At Bell Canada, David was instrumental in leading the [Field Services](#) organization's development and implementation of [Workforce Management](#), Mobile Interaction and Corporate Calendaring tools. He has worked extensively with the ClickSoftware Service Optimization Suite since 2000, successfully implementing ClickSchedule to both the inside and outside workforce, which included deploying state of the art mobile technology to Bell's Field team.

"I am very enthusiastic about joining this ever-growing organization. As a former Diabsolut client, I have seen them in action and they never ceased to impress and deliver. In the [Workforce Management](#) space, their approach is different, and that difference is highly sought after. It was an easy decision to join them" remarked Wilder, whose official new title is Diabsolut's VP of Innovation & Strategy.

"Many ground breaking ideas and concepts have been collected and it's time to breathe life into them. I am confident that with the depth of David's experience, as well as the experienced team

we've assembled, the Center of Innovation will deliver the kind of custom solutions that our clients are really looking for," said Diab. The Center of Innovation and David's role at Diabsolut officially began on January 2nd of this year.
