Joana Barbulescu of The AXIS Group of Companies

Investing in training courses and certifications from BICSI allows AGC to identify quality installations for long-term sustainability.

VANCOUVER, BC, April 23, 2014 **/24-7PressRelease/** -- AGC - The AXIS Group of Companies, comprised of Axis Technical Services and Axis Systems Group, credits ongoing success in part to its long-term association with BICSI (Building Industry Consulting Service International), Vancouver, B.C. April 27 - 29, 2014 will be a critical time for the teams at AGC to share expertise and to stay in-tune with the latest global standards.

"Investing in training courses and certifications from BICSI allows AGC to identify quality installations for long-term sustainability. BICSI is the recognized industry benchmark and sets the international standards in communications infrastructure, which in turn, pushes AGC to meet and often exceed these higher standards." - Joana Barbulescu, RCDD - President

The president of AGC, Joana Barbulescu, has maintained the BICSI RCDD designation for over 15 years through continuous learning and improvement. The high standards challenges the team to anticipate problems and formulate intelligent solutions in many large and medium-size projects.

AGC's quality assurance process starts by posing strategic questions regarding the scope and scale of all developments. This process includes: 1. Providing a Scope of Work, 2. Building a Review + Assessment, 3. Installing a Design and/or Build the Complete Project, 4. Incorporating a System of Quality Assurance, and 5. Following up on the Implementation Process.

Established in 2005, AXIS Technical Services (a part of AGC - Axis Group of Companies) was ranked BC's 5th Fastest Growing Company in 2008, and 98th in 2012. Partner, Joana Barbulescu, ranked 48th in 2009, 54th in 2010, and 98th in 2012 on the prestigious list of Canada's Top Female Entrepreneurs. Bob Fedoruk and Joana Barbulescu are the partners of AGC.

With Expertise Achieved Through BICSI, AGC Powers Up
