

NOVATO, CA, June 25, 2014 **/24-7PressRelease/** -- Radiant Logic, market-leading provider of a federated identity and context service based on virtualization, announced today that it has been named as one of IDG's Computerworld 2014 Best Places to Work in IT. Recognized for professional development opportunities, benefits, and diversity, Radiant Logic helps some of the world's largest enterprises face identity integration challenges by providing context-aware innovations for Identity and Access Management (IAM) initiatives.

"Hiring the best and the brightest IT pros, offering them competitive pay, and providing top-notch benefits is just the beginning for the outstanding employers on this year's Best Places to Work in IT list," said Scot Finnie, editor in chief of Computerworld. "Both newcomers to the list and rock-steady stalwarts nurture their talent with challenging business-critical projects, extensive training opportunities, and ongoing career development programs. They invest in their own futures by investing in their employees."

For more than 20 years, the editorial team at Computerworld has ranked the top 100 work environments for technology professionals. In addition to conducting extensive surveys of IT workers, each nominated company was required to submit a comprehensive questionnaire regarding its offerings in such areas as benefits, diversity, career development, training, and retention.

"Everyone has the opportunity to contribute here--whether you're an intern or an industry veteran, everyone has the chance to grow and develop their skills," said Alyssa Abbey, HR manager at Radiant Logic. "Even though our team has been expanding substantially, we've maintained a great sense of community and I think that's one of the things that makes Radiant an excellent place to work."

About Radiant LogicAs the market leader for a federated identity service based on virtualization, Radiant Logic delivers simple, logical, and standards-based access to all identity within an organization. The RadiantOne federated identity service enables customizable identity views built from disparate data silos, driving critical authentication and authorization decisions for WAM, federation, and cloud deployments. Fortune 1000 companies rely on RadiantOne to deliver quick ROI by reducing administrative effort, simplifying integration, and building a flexible infrastructure to meet changing business demands.
