

Answering Specialists, Inc. Reviews Infrastructure Resulting in Minimum Downtime

Written by Australian Business

SEATTLE, WA, September 10, 2014 **/24-7PressRelease/** -- In following it's master plan of developing an infrastructure that knows no downtime, Answering Specialists, Inc. review resulted in successfully implementing cloud computing in partnership with Amazon Web Services. The servers and back-up servers are professionally hosted and maintained by Amazon.

"By having Amazon Web Services host and maintain the servers for our platform," states Tom Cotton, IT Officer, "the team of professionals to keep downtime to a minimum has increased. While Amazon takes care of the servers, we can maintain the platform. This working relationship results in minimal downtime, if any."

Answering Specialists, Inc. is a telephone answering service company specializing in customized, True-Live, professional phone answering services to healthcare providers, the legal community, HVAC, construction, and many other industries that utilize off-site live phone receptionists.
