

SILVERADO, CA, October 09, 2014 /24-7PressRelease/ -- The [PMP Exam eFlashcards](#), the smartphone-based exam prep tool for PMP candidates, have been fully revised and updated to be compatible with A Guide to the Project Management Body of Knowledge (PMBOK Guide)--Fifth Edition.

There have also been a number of other improvements including full compatibility for iOS8 and a better experience for customers using a range of devices including Android, iPhones and iPads.

"We've also listened to feedback from customers who have told us they want a version that they can print out as well," says project management expert and OSP International LLC company President, Cornelius Fichtner, PMP. "We've created a downloadable PDF version that lets people studying for their PMP exam print flashcards at home."

The aim of the refresh is to make studying for the PMP exam even easier. Repetition is an effective form of studying facts: a perfect format to master PMP exam concepts. Flashcards help make repetitive learning a fast process and have the added benefit of enabling friends and family to easily help with a student's revision. With the eFlashcards also available on a PC, it's now even easier for project managers to get started with their PMP studies.

"We've reviewed every one of the 1,500 questions in the flashcards to be confident that they meet the new guidance in the revised PMBOK Guide," Fichtner says. "The PMBOK Guide is essential for anyone studying for the PMP exam but the exam will test more than that. The flashcards include questions based on the PMI Code of Ethics and Professional Conduct and other sources to provide a really comprehensive study aid."

Fichtner adds: "I'm committed to providing excellent multi-media study materials of the highest quality for PMP students. These flashcards fit your phone and your budget and are a simple way to keep your PMP study materials at your fingertips."
