RANCHO CUCAMONGA, CA, November 02, 2014 /**24-7PressRelease**/ -- Roque Development and Investments Inc. has expanded to a second office location as Southern California Edison's Pole Loading Program is in full effect. The expansion was led on to ensure the completion of the PLP, house the rapid growth of the company's employees, expand RDI's three company divisions, and to be the central location for this project. The Pole Loading Program will be in effect until 2017, which will evaluate all of SoCal Edison's utility poles to ensure all of the poles meet safety regulations and guarantee public safety. RDI Inc.'s second location is up and running as of November 2014.

"The Pole Loading Program is a large and important contract with Edison" said CEO, Hector Mendoza. "Before this contract, RDI had 20 employees. This specific contract requires 140 employees. We now have 160 employees. We have grown tremendously. Along with the PLP, we will continue to expand our engineering, construction, and real estate divisions" said Mendoza.

Roque Development and Investments Inc. was founded in 2009 with their first office located in Monterey Park, CA. That location is the primary office for RDI Inc.'s Carrier Solutions contract with SoCal Edison. The second locale will focus on becoming the primary office for the PLP as well as the expansion of the company's three divisions.

Roque Development and Investments Inc. offers a variety of services for the utility and telecommunications industries. At RDI, we offer highly effective project management and quality service in architecture, engineering and construction. RDI dedicates all resources to achieving maximum gain for their client. Each job is handled by a project manager with the experience, education, and skills needed to develop an individual service strategy to meet clients' specific needs.
