

SINGAPORE-- [Media OutReach](#) --28 January 2014-- [Konica Minolta](#) bizhub C364e and bizhub C454e were announced as the winners of the 2014 Buyers Laboratory LLC (BLI) "Pick" Award in the A3 colour category last week.

BLI, the leading provider of intelligence on document imaging products and solutions, has been putting products to the test for more than 50 years. Its "Pick" awards, presented twice annually, recognise the hardware and software offerings that measure up as the best performers in a comprehensive suite of tests that cover a wide range of the most important features and performance factors for buyers.

Based on BLI's report, building on a strong line of outstanding products, Konica Minolta's bizhub C364e and bizhub C454e are the winners of BLI's Winter 2014 "Picks" in the 31- to 40-ppm and 41-to 50-ppm speed ranges, respectively. Both models proved highly reliable over the course of a combined 275,000--impression evaluation. The

Multi-function peripherals (MFPs) were also praised for being highly productive and feature-rich, with powerful scanning capabilities.

Both units feature an enhanced version of the versatile, BLI-praised INFO-Palette touchscreen controlpanel. Some of the many enhancements include more soft keys and multi-touch controls along with the ability for users to flip through, edit and rearrange pages before scanning them. Both models also include a web utility that displays consumable status in 1-percent increments and predicted end of life dates so that administrators can be prepared to order new supplies. Further contributing to less downtime are the engines' high developer yields and

user-replaceable drums. All these features ensure that the bizhub C364e provides users with unparalleled amount of uptime and productivity.

Konica Minolta's bizhub C364e and bizhub C454e possess unrivaled productivity and is the multi function printer for organizations looking to optimize their productive capability, while being kind to the environment.
