

LONDON--([BUSINESS WIRE](#))--Whether you're looking to get connected to the broadband internet in a part of your home where you can't seem to get online, upgrade to cutting-edge Wi-Fi technology or you want to connect a Smart TV, BT's connected home product range can solve a wide range of connectivity issues around the home - and you can find out more simply by visiting the BT Shop website.

"From Wi-Fi extenders to dongles, BT Shop offers an extensive range for customers to choose from."

"In today's network society it's as important as it's ever been to stay connected to the wider world. That's why we offer a wide selection of products to help users get the very best out of their broadband connection at home," said Caroline Hodgson, BT Shop Executive at BT Shop. "From Wi-Fi extenders to dongles, BT Shop offers an extensive range for customers to choose from."

BT's broadband extenders work straight out of the box and turn every power socket around the home into a potential Ethernet port through their Powerline technology - making them ideal for online gaming or connecting a Smart TV as well as HD and 3D streaming.

Also, BT's Wi-Fi connectivity devices - perfect for mobile phones, tablets and laptops alike - can help improve the performance of wireless broadband around the home and can also enable you to get more out of old devices.

In addition, customers can also pick up five and eight-port gigabit Ethernet switches from BT Shop. These devices make it easier to connect all your wired devices at the same time - so whether you want to keep your home office connected to the web or you're looking to get the most out of your home entertainment system, BT switches can help you do just that.

To find out more about the range of BT connectivity devices available at BT Shop or to browse our wide selection of other products, simply visit the website at www.shop.bt.com.
