

MANCHESTER, England--([BUSINESS WIRE](#))--With the long-awaited and much-anticipated action adventure game **Batman: Arkham Origins** set for release on **October 25th**, [dabs.com](#) customers who buy a [NVIDIA GeForce Graphics Cards](#) while stocks last are also entitled to a free download of the game for PC.

"We're expecting this offer to be very popular with our customers - so anyone who wants to take advantage of it can't afford to waste any time."

The GeForce GTX's advanced gaming technologies - such as DirectX 11 tessellation, NVIDIA TXAA antialiasing for outstanding graphics performance and HBAO+ - make the GeForce GTX graphic card the perfect partner for Batman: Arkham Origins. GeForce GTX offers the kind of peerless, high-performance experience to truly do Batman: Arkham Origins justice.

Simply gear up with an NVIDIA GeForce GTX 660, 660 Ti, 670, 680, 760, 770 or 780 graphics card and you too can download this amazing new game for your PC totally free of any additional charge - but remember, this is a limited offer so you'll need to move quickly.

"It's not hard to see why Batman: Arkham Origins has got gamers all in a bit of a lather - but seeing as this is a truly next-level video game, it needs a next-level graphics card to go with it," said Duncan Rutherford, Product Manager at dabs.com. "We're expecting this offer to be very popular with our customers - so anyone who wants to take advantage of it can't afford to waste any time."

This offer runs for a limited time only and while stocks last, and eligible [dabs.com](#) customers will need to [follow the instructions here](#) following their purchase. A follow-up email will then be sent within 24 hours containing a download code, allowing the buyer to claim their free Batman: Arkham Origins download!
