Lord Eatwell presents his opinion on Iceland's macroeconomic position

The Winding-up Board (the „WuB“) is committed to maximizing value for creditors of Glitnir, and asset monetisation (including a potential sale of Glitnir's controlling stake in Islandsbanki) is a key component of the declared strategy in achieving this goal.

At an open meeting in London, Tuesday 5 November 2013, Professor Emeritus John Eatwell will present his independent opinion on macroeconomic balances and capital account liberalization in Iceland. The Winding-up Board of Glitnir hf. retained Lord Eatwell as an expert economist last August, for the purposes of an independent macroeconomic review of various issues relating to the Icelandic economy. The issues in question, among them reports from CBI, IMF and the so called ISK group, are relevant to the proposed restructuring by means of composition of Glitnir hf. and the estates of other insolvent Icelandic financial institutions.

Lord Eatwell is an internationally acclaimed economist, President of Queens' College,

Cambridge, Emeritus Professor of Financial Policy, University of Cambridge and Professor of Economics, University of Southern California. He is the author of some 33 books and 70 scholarly articles on economics, economic policy and finance, including, most recently, *The Fall and Rise of Keynesian Economics*, (with Murray Milgate), 2011. He is a Member of the ESRC Centre for Business Research (CBR), Cambridge, adviser to E.M. Warburg Pincus & Co. International Ltd. and Palamon Capital Partners, LLP and a Commissioner at the Jersey Financial Services Commission.

The meeting is open to creditors of Glitnir and the press, as well as other interested. Attendees are asked to register by email to creditormeeting@glitnirbank.com. A dial-in number will be provided for those not able to attend the meeting in person, and dial-in arrangements will be published closer to the meeting.
