Now featured on the website is the Nikon 1528 Df, the thinnest and lightest model of the brand. It includes a 16.2 megapixel image sensor along with EXPEED 3 image processing. The 24.2 megapixel CMOS based Nikon D3200 featured as well. The product allows users to take high quality photos and HD 1080p movies no matter what the lighting condition is like.

A review of the Nikon D7100 reveals its benefits such as high image quality, speed, and creativity potential. Featuring a 24.1 megapixel image sensor, it also offers a superior level of connectivity. Those looking for high-power zoom lenses, the Nikon D3100 features 18-35 mm and 55-200 mm lenses for advanced shooting.

Checkpricefirst.com has also added the Nikon D800E to its list, a specialized camera with sophisticated features for serious photographers. The Nikon D5200 is similarly exceptional, providing photographers with a new perspective in shooting.

Checkpricefirst.com now gives shoppers an advantage ahead of one of the busiest shopping days of the year with Nikon Cyber Monday Deals 2013. For more details, go to www.checkpricefirst.com/nikon-cyber-monday-2013
