

HyperX Sets Overclocking World Record Mark at 4500MHz, Partners with HWBOT

Written by Australian Business

FOUNTAIN VALLEY, Calif.--([BUSINESS WIRE](#))-- [HyperX](#)®, a division of [Kingston Technology Company](#), Inc., the independent world leader in memory products, today announced its memory was overclocked to 4500MHz, the highest frequency in the world. The mark was set by overclocker “Hicookie” of [GIGABYTE™](#). He achieved the frequency using one 4GB HyperX DDR3 2933MHz module (not yet available) on the new [GIGABYTE Z97X-SOC FORCE LN2](#) motherboard.

The frequency is posted on [HWBOT](#), the premier site for PC enthusiasts looking for news, tips and information on overclocking, benchmarks and competitions. Beginning June 1, HyperX officially became the newest partner with [HWBOT](#). Together with HWBOT, HyperX looks forward to continuing its association with the overclocking community.

On June 5, during [COMPUTEX TAIPEI](#), HyperX will hold its “HOT” [HyperX OC Takeover](#) competition. Overclockers from around the world will [compete](#) for \$10,000 (USD) in total prize money for the top scores in Maximum Memory Frequency, SuperPi 32M and XTU with a secret processor to be revealed at the event. During the remainder of 2014, HyperX will hold four online regional HOT competitions on HWBOT.org leading up to a \$15,000 World Finals competition during [2015 International CES](#)®.

[HyperX](#) is the high-performance product division of Kingston® Technology encompassing high-speed DDR3 memory, SSDs, USB Flash drives and headsets. Targeted at gamers, overclockers and enthusiasts, HyperX is known throughout the world for quality, performance and innovation. HyperX is committed to eSports as it sponsors over [20 teams](#) [globally](#) and is the main sponsor of [Intel Extreme Masters](#)
