

RESTON, Va.--([BUSINESS WIRE](#))--PIXIA Corp., the US industry leader in fast access to large data, announced a new relationship with Esri to integrate PIXIA's geospatial intelligence solutions into Esri's ArcGIS Online, Portal for ArcGIS, and ArcGIS MarketPlace. This relationship makes PIXIA's powerful suite of software services available to Esri users for the first time.

"We are excited to provide access to petabytes of geospatial intelligence to Esri users. The integration of PIXIA solutions into the Esri ecosystem creates exceptional value for our customers, many of them also Esri users," said Patrick Ernst, PIXIA Co-Founder.

PIXIA's input-output engine provides Esri users unmatched speed and scalability to create access to high volumes of geospatial data such as high-resolution imagery, wide area motion imagery and full motion video. These services are complemented by tools that update data in near real-time to ensure all ArcGIS users including those in remote locations have access to new data as quickly as it's collected.

"We are pleased to partner with PIXIA, whose innovative technology manages and serves advanced Intelligence, Surveillance and Reconnaissance (ISR) data," said Ben Conklin, Lead for Defense & Intelligence Solutions at Esri. "Providing simple access to this data for Esri users will greatly increase the value of this information and improve the workflow of analysts supporting decision making."

About PIXIA Corp.

PIXIA Corp. provides high-speed data access to massive volumes of large datasets so users pull only the information they need, when and how they need it. PIXIA solutions adhere to international open standards with extreme scalability and interoperability to make massive data accessible anywhere around the globe.
