

## 888poker Launches MAC Poker Software

Written by Australian Business

---

GIBRALTAR, October 4, 2013 /PRNewswire/ --

[888poker.com](http://888poker.com) , global online poker leader, has recently released a new poker software for MAC users.

The updated [888poker MAC software](#) is available for download on all MAC devices. The software includes all the state-of-the art features available on other PC software versions, including 3D graphics, **Pokercam** tables, **Teams** tournaments, Private Games, Quick Seat and more.

This new software release is in a long line of recent upgrades and releases from 888poker, such as, the launch of the upgraded mobile applications which now offer multi-table tournaments in addition to cash games and sit n' gos.

These product releases alongside several customer focused marketing campaigns has shown notable increases to the player interaction which has secured a 3<sup>rd</sup> place liquidity ranking in Pkerscout overtaking poker megabrand, Full Tilt poker.

Inbal Lavi, Vice President of 888poker, stated, "888poker is continually improving its products and offerings to ensure the best poker experience available to the broadest audience possible. The MAC software was the natural next step in our list of product releases. We look forward to our players having even more access to our **DIFFERENT** poker experience and look forward to our future release that are to come. "
