

## AVT's Utique Shop Turning Heads in Detroit Metropolitan Airport

Written by Australian Business

---

CORONA, Calif., Dec. 30, 2013 /PRNewswire/ -- AVT, Inc. (OTC Markets: AVTC) ([www.automatedetail.com](http://www.automatedetail.com)), a technology leader in developing automated retailing systems, kiosks, custom vending machines and micro-stores, announced that their innovative Utique Shop has been prominently placed in the Detroit Metropolitan Airport (DTW).

DTW is Michigan's busiest airport and one of the world's leading air transportation hubs. DTW ranked highest in overall customer satisfaction among large airports in a recent J.D. Power and Associates North America Airport Satisfaction Study. With two new, state-of-the-art passenger terminals, DTW is among the world's most efficient, customer friendly and operationally capable airports in North America.

Utique is an interactive, touch-sensitive, automated luxury store for today's modern shopper. The Utique shop offers an assortment of luxury and personal items such as gifts, gadgets, electronics, and skincare items by high-end and niche labels. Shannon Illingworth, Founder and Chairman of AVT explains, "We wanted to bring high-end, luxury products to men and women in a fast, friendly and engaging manner," he said. "The Utique Shops are the latest innovation in the growing trend toward automating the retailing process by enabling customers to purchase through micro stores and providing the right selection of merchandise in a convenient location."

The high-profile machines have been deployed in airports, resorts, entertainment destinations and malls nationwide. They can generate up to 10 times more revenue per square foot than traditional retail, at far lower operating costs.

"Retailers are looking for solutions that allow them to grow efficiently, enhance their brand, and stay connected to consumers," Illingworth commented. "And consumers are seeking quality, convenience and engaging, multi-channel shopping experiences. Utique Shops provide all that and more."
