

NEW YORK, Oct. 25, 2013 /PRNewswire-iReach/ -- To achieve Oracle Validated Integration, Oracle partners are required to meet a stringent set of requirements that are based on the needs and priorities of the customers. MWA Express Server integrates with the existing Oracle WMS and Oracle MSCA product and infrastructure. It allows personalizations to be applied at different levels (site, responsibility, organization and user). The personalizations can be applied without programming knowledge or modification to Oracle E-Business Suite code, making them easy to do and patch-safe."Intellinum is proud that MWA Express Server has achieved Oracle Validated Integration. MWA Express Server enables customers to maximize their Oracle E-Business Suite investments," according to Romi Halimman, President and CEO of Intellinum. "Using this product, customers or implementers can help streamline warehouse operations by reducing unnecessary data entries and enforce additional business rules. This is necessary as no two businesses are alike. Prior to the advent of MWA Express Server, these changes required customizations which some companies choose to avoid due to company policy or concerns about cost and maintenance." "Oracle Validated Integration applies a rigorous technical review and test process," said Kevin O'Brien, senior director, ISV and SaaS Strategy, Oracle. "Achieving Oracle Validated Integration through Oracle PartnerNetwork gives our customers confidence that the integration between Intellinum MWA Express Server 1.0 and Oracle E-Business Suite 12.1 has been validated and that the products work together as designed. This helps reduce deployment risk and improves the user experience for our joint customers."

About Intellinum [Intellinum Inc](#) provides technical experience and a wide range of consulting services in supply chain management. Our philosophy is to be your partner in business-to-empower your business with innovative and reliable software solutions in a time-saving and cost-effective manner. We provide consulting services for Oracle E-Business Suite Warehouse Management System and Oracle Mobile Supply Chain Applications implementation, integration with third-party and legacy systems, custom extensions, and maintenance support.

About Oracle Validated Integration Oracle Validated Integration, available through the Oracle PartnerNetwork (OPN), gives customers confidence that the integration of complementary partner software products with Oracle Applications and specific Oracle Fusion Middleware solutions have been validated, and the products work together as designed. This can help customers reduce risk, improve system implementation cycles, and provide for smoother upgrades and simpler maintenance. Oracle Validated Integration applies a rigorous technical process to review partner integrations. Partners who have successfully completed the program are authorized to use the "Oracle Validated Integration" logo. For more information, please visit Oracle.com at <http://www.oracle.com/us/partnerships/solutions/index.html>

About Oracle PartnerNetwork Oracle PartnerNetwork (OPN) Specialized is the latest version of Oracle's partner program that provides partners with tools to better develop, sell and implement Oracle solutions. OPN Specialized offers resources to train and support specialized knowledge of Oracle products and solutions and has evolved to recognize Oracle's growing product portfolio, partner base and business opportunity. Key to the latest enhancements to OPN is the ability for partners to differentiate through Specializations. Specializations are achieved through competency development, business results, expertise and proven success. To find out more visit <http://www.oracle.com/partners> .
