

SAN JOSE, Calif., Jan. 13, 2014 /PRNewswire/ -- Flextronics (NASDAQ: [FLEX](#)) announced today that its Product Innovation Center and Facility in Milpitas, California facility was recognized for manufacturing excellence and selected as one of IndustryWeek magazine's "Best Plants" for 2013.

Each year, IndustryWeek's Best Plants program recognizes facilities on the leading edge of manufacturing and operational excellence, with ongoing efforts to increase competitiveness, enhance customer satisfaction, and create stimulating and rewarding work environments.

"Flextronics is committed to driving operational excellence across our operations and providing world-class supply chain solutions," said Francois Barbier, president of Global Operations and Components at Flextronics. "We are very proud of the Flextronics team in Milpitas and their relentless drive to enable and scale innovation at this facility, while simultaneously exceeding customer expectations."

About Flextronics Flextronics (Reg. No. 199002645H) is a leading end-to-end supply chain solutions company that delivers design, engineering, manufacturing and logistics services to a range of industries and end-markets, including data networking, telecom, enterprise computing and storage, industrial, capital equipment, appliances, automation, medical, automotive, aerospace and defense, energy, mobile, computing and other electronic product categories. Flextronics is an industry leader with more than \$24 billion in annualized sales, generated from helping its customers design, build, ship, and service their products through an unparalleled network of facilities in more than 30 countries and across four continents.
