) Dr. Robert Mirabile of Best Impression Cosmetic Surgery and Medical Spa recently purchased an Ulthera laser to use for non-surgical skin tightening. Dr. Mirabile, a board-certified plastic surgeon, is pleased to offer Ultherapy to patients who would like to lift, firm and tighten lax skin around the face or neck.

During an Ultherapy session, Dr. Mirabile delivers focused ultrasound waves to the treatment area, heating the deep layers of the skin. The heat stimulates the body to regenerate its collagen matrix and rebuild new skin cells, which results in a natural lift, gradual tightening and smoother complexion.

Treatment with the FDA-approved Ulthera laser is recommended for individuals who are beginning to see wrinkles, sagging skin and other signs of aging, but are not yet ready for a full facelift. The minimally invasive procedure takes approximately 30 to 60 minutes and does not require any recovery time.

Philadelphia Ultherapy patients can see some initial improvements, with full results becoming more evident after two to three months.

Ultherapy is safe to combine with other laser treatments and injectable fillers for more comprehensive results. To learn more about Dr. Mirabile, Ultherapy and the facial rejuvenation options available at Best Impression Cosmetic Surgery and Medical Spa, please visit <http://www.philadelphia-cosmetic-surgery.com> or call 610-272-8821.
