

NEW YORK, Sept. 11, 2013 /PRNewswire/ -- Reportlinker.com announces that a new market research report is available in its catalogue:

**[2014 Opportunities in the US Blood Banking Market](http://www.reportlinker.com/p01622683/2014-Opportunities-in-the-US-Blood-Banking-Market.html#utm_source=prnewswire&utm_medium=pr&utm_campaign=In_Vitro_Diagnostic)** [http://www.reportlinker.com/p01622683/2014-Opportunities-in-the-US-Blood-Banking-Market.html#utm\\_source=prnewswire&utm\\_medium=pr&utm\\_campaign=In\\_Vitro\\_Diagnostic](http://www.reportlinker.com/p01622683/2014-Opportunities-in-the-US-Blood-Banking-Market.html#utm_source=prnewswire&utm_medium=pr&utm_campaign=In_Vitro_Diagnostic)

**2014 Opportunities in the US Blood Banking Market** is a new strategic analysis prepared by Venture Planning Group in order to help current suppliers and potential market entrants identify and evaluate emerging opportunities and assist industry executives in developing effective business, new product development and marketing strategies.

### Rationale

During the next five years, the US blood banking market is expected to undergo significant transformation, which will result from the convergence of several trends, including more stringent regulations; advances in diagnostic technologies, IT, system engineering and automation; and intensifying competition. Some segments will start resembling commodity markets, where product positioning and differentiation are more critical than underlying technology.

The changes in the marketplace will create exciting opportunities for new instruments and reagent systems, as well as auxiliary products, such as specimen preparation devices, controls, calibrators, and innovative IT applications.

### **Strategic Recommendations**

- New product development opportunities with significant market appeal.- Alternative market penetration strategies.- Potential market entry barriers and risks.

The report explores future marketing and technological trends in the US; provides estimates of the test volume, instrument placements and sales; compares features of major automated and semi-automated analyzers; profiles leading and emerging competitors; and identifies specific product and market opportunities facing suppliers during the next ten years.

### **Blood Typing and Grouping Tests**

ABO, Antibody Panels, Antibody Screening/Indirect Antiglobulin, Antigen Typing (C, c, Duffy, E, e, I, i, Kell, Kidd, Le a, b, MN, P, S, s), Antiglobulin (Direct, C3 + IgG, IgG, C3), Crossmatching (Immediate Spin, Full Crossmatch), Rh (D, Du).

### **Infectious Disease Screening Tests**

AIDS (HIV NAT, HIV-1/2), Cytomegalovirus, Hepatitis (HAV NAT, HBV NAT, HBs Ag, Anti-HBc, HCV NAT, HCV, ALT/SGPT), HTLV-I/II, Parvovirus B19 NAT, Syphilis, West Nile Virus NAT.

### **Sales and Market Share Analysis**

Sales and market share estimates of leading suppliers of blood banking of reagents and

instruments, by individual product.

### **Competitive Assessments**

Strategic assessments of major suppliers and emerging market entrants, including their sales, product portfolios, marketing tactics, and new products in R&D.

### **Market Segmentation Analysis**

- Comprehensive market segmentation analysis, including review of the market dynamics, trends, structure, size, growth, and key suppliers.

- Test volume and sales forecasts for over 40 blood banking tests, including NAT, by market segment:

- Blood Centers- Plasma Fractionation Facilities- Hospitals- Commercial/Private Laboratories- Military Blood Banks

### **Current and Emerging Products**

- Analysis of current and emerging blood banking tests.

- Review of automated and semi-automated analyzers, including their operating characteristics, features, and selling prices.

### **Technology Review**

# 2014 Opportunities in the US Blood Banking Market

Written by Australian Business

---

- Assessment of current and emerging technologies, and their potential applications for the blood banking market.

- Comprehensive lists of companies developing or marketing new technologies and products by test.

Contains 460 pages and 53 tables

## **I. Introduction**

## **II. Major Product Development Opportunities**

A. Blood Typing and Grouping  
B. Infectious Disease Screening  
C. Auxiliary

## **III. Alternative Market Penetration Strategies**

A. Internal Development  
B. Collaborative Arrangements  
C. University Contracts

## **IV. Potential Market Entry Barriers and Risks**

A. Market Maturity  
B. Cost Containment  
C. Competition  
D. Technological Edge and Limitations  
E. Patent Protection

## **V. Worldwide Technology and Market Overview**
