

FAIRFAX, Va., Sept. 19, 2013 /PRNewswire-iReach/ -- SoBran, Inc., the leading provider of biomedical, engineering, logistics and SafeMail® screening services, today announced the company's participation at MAILCOM 2013 in Las Vegas NV, September 22-24, at the Riviera Hotel.

Keith James, a SoBran SafeMail subject matter expert, will lead three instructional panels. James will be sharing his expertise and best practices gleaned from SoBran's 12 years serving and securing clients such as the Department of Homeland Security, the Department of Defense and the Department of Transportation.

Safeguarding Your Facility From Mail Borne Threats

A look at the pros and cons of using offsite, multi-customer facilities to fulfill mail screening requirements. The seminar provides attendees with an overview of the SafeMail NY mail screening facility, its capabilities, and limitations and how such facilities can be leveraged to meet screening requirements with minimal disruption and cost.

Monday, September 23, 2013, Round Three, 10:15-11:15 am - in Capri 106

What's Your Threat Level?

An overview of current best practices in the commercial and government sectors and ways to develop screening requirements based on organizational risk analysis and threat level determination.

Monday, September 23, 2013, Round Seven, 4:30-5:30 pm - in Capri 106

Screening on a Shoe String: Developing Effective Mail Screening on a Budget

Mail screening facilities do not have to look like they just rolled off the set of Star Trek to be effective. Cost effective, simple solutions are available if you know where to look.

Tuesday, September 24, 2013, Round Eight, 8:30-9:30 am - in Capri 103
