

Hall Plastic Surgery Rejuvenation Center Celebrates Its 6 Year Anniversary!

Written by Australian Business

AUSTIN, Texas, Oct. 11, 2013 /PRNewswire/ -- **Hall Plastic Surgery & Rejuvenation Center** invites the public to attend its six year anniversary celebration On Tuesday, October 15th

from

4pm

—

7pm

. All those interested in attending can visit Hall Plastic Surgery for food, drinks, and raffle drawings. This event will include 20% off treatments booked at the event as well as \$106

gift certificates to Hall Plastic Surgery & Rejuvenation Center for all attendees.

The Mardi Gras themed event will include a photo booth and the opportunity to partake in the "Dunk-The-Doctor" dunk tank! Honorary participant and board certified plastic surgeon; Dr. Jeffrey Hall will be part of this event.

Treatments available at Hall Plastic Surgery include:

Cellulaze™: the first laser treatment to address the root causes of cellulite from underneath the skin's surface. A small laser fiber is used to decrease the appearance of bulges and dimples, while using targeted heat to increase the elasticity and thickness of the skin for a smoother looking appearance. Cellulaze is a single treatment that is clinically proven to increase your skin's natural thickness for a smoother healthier looks lasts

1

.

- Cellulaze Event Special: 50% off the first treatment area when a second treatment area is booked.*

Written by Australian Business

PicoSure™: the first and only picosecond laser tattoo removal. PicoSure takes advantage of photo-mechanical impact stress to shatter ink into the smallest of particles that are more easily absorbed and eliminated through the body's natural processes. Clinical data shows that picosecond technology is safe and effective for tattoo removal and that PicoSure treatments demonstrate better results in fewer treatments².

- PicoSure Event Special: \$200 dollars off package of 4 PicoSure tattoo removal treatments*

CoolSculpting®: uses a patented method for the reduction and removal of unwanted fat tissue through Cryolipolysis. Cryolipolysis creates a precise way of controlled cooling to remove excess fat. This method is designed to damage and eliminate fat cells without injury to the skin or other tissue that results from more invasive procedures such as liposuction. This non-surgical approach is suitable for patients who need minimal fat reduction, as well as for those who are hesitant to undergo surgery for fat removal.

- CoolSculpting Event Special: \$500 for small applicator, \$1000 for a large applicator*

The Hall Plastic Surgery & Rejuvenation Center is located at 300 Beardsley Lane #101 in Austin, Texas. For more information about this event or to register please visit HallPlasticSurgery.com or please contact Lindsey Rambo at (512) 302-5558.
