

## Medbox and Its Clients Benefit From Another Huge Arizona Court Ruling

Written by Australian Business

---

WEST HOLLYWOOD, Calif., Oct. 15, 2013 /PRNewswire/ -- Medbox, Inc. (OTC Markets: MDBX) ([www.medboxinc.com](http://www.medboxinc.com)), a leader in providing industry specific consulting services and patented systems to the medical and retail industries, responded to a landmark ruling issued by an Arizona state court yesterday that sent positive reinforcement throughout the medical marijuana industry in Arizona.

As reported by the Associated Press today, A judge has overturned Maricopa County's zoning ordinance for medical marijuana dispensaries, ruling that the 2011 local law was a "transparent attempt" to keep the businesses out of county areas outside incorporated cities and towns.

Superior Court Judge Michael Gordon said the county wrote the zoning ordinance so that it wouldn't allow dispensaries to be established because marijuana remains illegal under federal law.

"This court will not rule that Arizona, having sided with the ever-growing minority of states and having limited it to medical use, has violated public policy," Judge Michael Gordon of Maricopa County Superior Court wrote.

Company CEO, Dr. Bruce Bedrick commented, "The decision paves the way for some of our clients that were granted licenses by the state but were prevented from erecting a dispensary by the county. We are extremely happy for our clients."

Medbox played a key role during the Arizona dispensary lottery system and helped its consulting clients obtain 20 of the 97 total licenses granted by the Arizona Department of Health

Services. The 2-year process was fraught with legal challenges and pitfalls that Medbox properly navigated on behalf of its clients. This ruling directly affects Medbox and its clients since 7 of the 20 approved licenses were in Maricopa County zones. Thus, Medbox will now be able to complete those contracts and receive additional revenue from its clients as a result.

### About Medbox, Inc.:
