

SILVER SPRING, Md., Oct. 23, 2013 /PRNewswire/ -- Pharmagen, Inc. (OTCBB: PHRX) (the "Company" or "Pharmagen") today announced that Clotamin® is now available at CVS.com. Clotamin® is a unique and complete multivitamin formulated without vitamin k to meet the special nutritional needs of people taking blood thinning medications (anticoagulants) such as Warfarin. Because it does not contain vitamin k, Clotamin® can be taken with Warfarin. Warfarin is the most prescribed blood thinning medication in North America

and is also known under the brand names of Coumadin

®

, Jantoven

®

, Marevan

®

, and Waran

®

. Warfarin therapy reduces the formation of blood clots, which is important in the prevention of heart attacks, strokes, and blockage of major veins and arteries.

Vitamin k is a common ingredient in most multivitamins on the market and can thicken blood and interfere with Warfarin therapy. People who are prescribed blood thinners are required to follow strict nutritional guidelines in order to maintain healthy International Normalized Ratio (INR) levels. The most significant of these guidelines is the consumption of a consistent amount of vitamin k in their diet. Clotamin includes Biotin to prevent hair loss associated with Warfarin as well as a full b complex to boost energy.

To find Clotamin® at CVS.com, follow this link <http://www.cvs.com/search/ /N-0?searchTerm=clotamin&pt=global>

About Pharmagen
