) Waterbury, CT - TeethXpress of Western Connecticut is now providing immediate smiles for residents and individuals in Waterbury and Torrington, Connecticut, with a permanent teeth replacement solution referred to as TeethXpress.

The team of dentists at TeethXpress of Western Connecticut, a specialized practice in Waterbury and Torrington, announces their office is now providing immediate smiles with TeethXpress technology. Improving the quality of life for patients, the [TeethXpress service](#) involves the use of 4 to 6 implants that are strategically placed to permanently replace lost or missing teeth. It is an immediate-load solution designed to resolve the problems associated with multiple missing teeth.

"Patients who are missing multiple teeth have several replacement options available to them. I believe its important for our patients to also realize that their choice is going to impact their lifestyle considerably," stated [Dr. Israel](#) , one of the team members at TeethXpress of Western Connecticut. "I want them to understand that modern dentistry now provides a great option for immediate smiles that looks, feels, and functions just like their natural teeth. The TeethXpress solution also helps to prevent gum tissue shrinkage and bone loss, preserving facial appearance."

For patients who qualify, the TeethXpress solution is an innovative process offering several benefits to the patient as a permanent solution for missing teeth that restores functionality as well confidence in your smile. It has been designed to address commonly experienced problems associated with traditional, removable teeth replacements, such as slippage, difficulty chewing, irritation, infection, pain, and slurred speech. Your new, permanent teeth with be beautiful and functional and will preserve the natural aesthetic of your face.
