

(PRLEAP.COM) **Qualified Dentists can secure an annual listing in the health-conscious dental directory for just \$99**

MESA, AZ (January 9, 2014) Family Dental Guide, an online dental directory that features health-conscious dentists, is offering special pricing for dentists to join the directory in the month of January. Qualifying dentists can secure an annual listing at Family Dental Guide for just \$99.

The directory specializes in showcasing "healthy dentists"—those who have holistic, biological, or mercury-free dental practices. These dentists are those who seek to find connections between abnormalities in the mouth that relate to one's total health. "I remembered being shocked when I learned that not all dentistry is good dentistry and I am excited to be a conduit for dentists who have chosen the high road to help educate patients who want the best in dental health for themselves and their families," says Anthony Kirlew, founder of Family Dental Guide.

The directory is especially beneficial for dentists who haven't done much marketing because of the low cost of entry. For those who are looking to grow their practices, it can be the start of a new marketing channel.
