

EvolveMed Integrates Nuance's Cloud-based Speech Technology

Written by Australian Business

SALT LAKE CITY, Feb. 24, 2014 /PRNewswire/ -- EvolveMed, an industry leader in intuitive [physician electronic medical records](#) for hospitals and physician practices, is pleased to announce its integration of Nuance 360 SpeechAnywhere Services. By leveraging Nuance technology, TalkChart can enhance the intuitive efficiency of its powerful cloud-based medical records with robust speech-integrated services.

"With this new integration, TalkChart offer's physicians enhanced functionality that combines the best of on-demand voice, structured adaptable workflow, continuous document improvement, and anytime, anywhere access," said Andrea Jaques, Business Development Manager, EvolveMed.

Nuance enhances TalkChart's ability to adapt to a physician's style of communication and workflow preferences, with speech-driven clinical documentation and voice navigation. Physicians can dictate on any device, anytime and anywhere and, medical speech recognition boosts TalkChart's proven documentation productivity by cutting documentation time in half without sacrificing quality or completeness—resulting in better patient care and improved practice revenues.

"EvolveMed is excited to demonstrate how TalkChart's innovative new integrated platform will significantly improve charting efficiency and workflow, and maximize cost efficiency for hospitals and clinics alike," said Jaques.

To see a live product demonstration of TalkChart with integrated medical speech recognition, visit Nuance's booth #3765 at HIMSS14 in Orlando, FL on Wednesday, February 26, 2014.
