

## New OHT Peptide 3 Anti-Aging Formulation Added to HerAnswer.com Product Line

Written by Australian Business

---

( [PRLEAP.COM](http://PRLEAP.COM) ) HerAnswer.com, distributor of healthcare supplements for men and women, announced today that they are expanding their line of skincare products by adding OHT's newly formulated Peptide 3 anti-aging cream. OHT Peptide 3 supports healthy skin in several ways as it is a targeted, multi-layered dermal therapy. It diminishes fine lines, reduces crow's feet and wrinkles, reduces sagging and improves the firmness and elasticity of the skin.

"OHT Peptide 3 is an incredibly beneficial product so we couldn't be happier about offering this restorative skincare formula to our customers," said Tim Rose, owner of HerAnswer. "We are the best source for top quality healthcare products for both women and men so adding OHT Peptide 3 to our lineup was a natural fit for us," added Rose.

Peptides are protein molecules that are found naturally in the body. They send out signals when damaged skin needs to be repaired. The three patented peptides used in OHT's new formula are Hexanoyl Dipeptide-3, which speeds up cell renewal for fresher more vibrant skin, Trifluoracetyl Tripeptide-2, which reduces signs of aging, and Palmitoyl Tripeptide-38, which fills in wrinkles on the forehead and crow's feet.

HerAnswer.com has been a leading distributor of skincare products and other healthcare supplements for over 12 years. Their extensive line of products includes Can-C eye drops, skincare products, Kegel exercise machines, Uriflow, D-Mannose for UTIs, and many other personal care products. "Our focus is always on providing great prices with outstanding customer service. The price we show is the price our customers pay," said Rose in commenting on HerAnswer.com's customer service policy.
