May 27, 2014 - Clearwater, FL

– The Dentist place, a family and cosmetic dental office, has completed reconstruction to provide a more accommodating space for optimal dental treatment.

Murad Rashid, DMD, and associate dentists Dr. Morar and Dr. Pulido, have recently taken part in an office overhaul to provide room for their growing practice and family of patients. The remodel happened in conjunction with the larger renovation of the Sears department store and mall where their office is located.

"We're in a unique situation with the remodel of the entire mall community that we're a part of – we were able to complete this overhaul to better serve our patients to quality care in a comfortable and welcoming space," [Dr. Rashid](#) explained.

The Dentist Place has been serving their community for over 30 years and continues to improve their methods in order to give their patients the best of modern, effective dental care. Dr. Rashid's office uses digital x-rays and other advanced diagnostic equipment to help map out detailed treatment plans. Because their unique location sees heavy foot traffic, their practice remains flexible and up-to-date on the best treatment methods to accommodate same-day [emergency dental care](#) for walk-in patients.

"Our office remodel is a part of our continuing improvement process to help our patients feel at ease, knowing they are being treated by dental professionals who are constantly seeking ways to make their experience better," Dr. Rashid added.

About The Dentist Place and Murad Rashid, DMD

Dr. Rashid is a native from central Florida and received both his undergraduate and dental
