Newbury Park, California June 05, 2014 [Health News](#) ([PRLEAP.COM](#))

June 5, 2014 - Newbury Park, CA – The Centers of Healing, a holistic dentistry practice led by Dr. Blanche Grube and Dr. David Villarreal, is offering residents of Ventura County, and surrounding areas, a more natural alternative to many of the harsher procedures provided by mainstream dental practices.

Villarreal and Grube are both board certified biological dentists (IABDM) and have years of experience in the oral health field. The Centers for Healing was founded with the belief that your physical, mental, and emotional wellbeing are all connected, and that the impact of your dental health can be far-reaching. Their practice centers on services that have been largely ignored by the traditional dental community, such as natural dental cleanings, acupuncture, and massage therapy, while also providing all the services of conventional practices.

The Centers for Healing is a full service, family-friendly organic dentistry practice that is just as concerned with educating their patients and preventing dental decay as they are with repairing it. They focus on minimizing the use of artificial numbing agents, fillings that contain toxic chemicals, and other potentially harmful practices used by many modern dentists. They offer conscious sedation, IV therapy, and auxiliary treatments as well as consultations on nutrition and treatment of bite issues and alignment problems.

[Vitamin IV](#) treatments can help restore balance and optimize your body's performance, offering a natural boost for better well-being.

About The Centers for Healing
The Centers for Healing is a new holistic dentistry practice located in Newbury Park, CA. The center is dedicated to overall physical, mental, and spiritual wellness through oral health and believes that traditional dentistry often uses practices that can have a negative impact elsewhere in the body. The Centers of Healing was founded by Dr. David Villarreal and Dr. Blanche Grube, both board certified by the International Academy of Biological Dentistry & Medicine.
