

The Door Store Brings To The Market The Best In Walnut Doors

Written by Australian Business

(PRLEAP.COM) The Door Store supplies doors of every kind from its warehouses based on its great website sales set up. This system has allowed The Door Store to supply large quantities of top quality doors to the construction market at prices that are very competitive and with an excellent delivery service to meet the needs of its customers. One of the best ranges of doors that it now sells is the walnut range and in particular the LPD Catalonia Walnut Europa Flush Internal Door. Walnut is a very rich looking wood that has that lovely deep colour that will fit well throughout any house.

These doors are not particularly cheap in comparison to many other doors but The Door Store prices are very competitive to other [walnut door](#) suppliers and all the doors come pre finished. Walnut is generally a costlier wood but the designs are superb and will grace any home whether modern or a little older. The LPD Catalonia Walnut Europa Flush Internal Door is a smart flush door, which has been fully engineered to give a good strong door that will not warp and is finished to a very high standard.

The Door Store is pleased to promote this range of doors as they are built with vertical plank of wood at each side with three rebated squares fitted equidistant between them with wide wood plank spacers between them. These doors are fully veneered with a good walnut veneer and finished with a clear satin lacquer so that they once they are fitted in the frames and the appropriate door furniture fitted they will be ready for use.

If extra light is required then The Door Store can supply the [LPD Catalonia Walnut Glazed Europa Flush](#) Internal Door, where the three rebated sections are replaced with a full glazing system. This glazed door is a complete match with the flush door without glazing and work well throughout the building. These doors work very well in the executive office suite environment where an imposing look is useful for the company's aspirations. This also works well where a chic look is required with modern barn conversions and new builds being particularly impressive when fitted with the LPD Catalonia Walnut Europa Flush Internal Door Range. This is also a range where a full set of fire doors can be supplied, obviously not in the glazed version but the standard doors can fully fire conform to the normal safety requirements and give all the occupants adequate time to escape.

The-Door-Store.co.uk are pleased to promote this range of doors as it provides a look which is totally different from the typical internal door and yet it will fit in delightfully with a complete range of decoration and different types of building. If a rich look is required and the customer is looking for something different then the LPD Catalonia Walnut Europa Flush Internal Door from The Door Store is a very acceptable way to follow.
