

## Fan Outlet Opens for Business on the Web

Written by Australian Business

---

( [PRLEAP.COM](http://PRLEAP.COM) ) Greensboro, N.C. - Modern Fan Outlet, retailer of ceiling fans for any home, office or business, announced today that their website and online ceiling fan retail outlet is open for business on the web at [ModernFanOutlet.com](http://ModernFanOutlet.com). Modern Fan Outlet has a retail showroom in Greensboro, N.C. that has been open for more than 30 years, but the expansion of the Internet and the new shopping preferences of their prompted the owners of Modern Fan Outlet to create an online retail store to showcase their products. The company carries a huge inventory of ceiling fans to suit every taste and style but their specialty is in modern, contemporary ceiling fan designs from the top manufacturers in the industry.

Shoppers to the Modern Fan Outlet website will find a wide variety of ceiling fans to choose from. From outdoor and tropical ceiling fans to double and dual motor ceiling fans, the new Modern Fan Outlet online store has the most impressive inventory in the industry. The thing that truly sets Modern Fan Outlet apart is their focus on modern, contemporary ceiling fan designs from top manufacturers such as Minka Aire, Ellington, Gulf Coast and many others. These fans have clean lines for a sleek look that brings them to the forefront of functional design. They are engineered with quality materials and strong motors that bring with them a new definition for functional architecture.

Owner and president of Eller Enterprises, Jeff Eller, had this to say about the company's new website, "We're very excited about opening our Modern Fan Outlet online ceiling fan store. Now our clients can shop from home 24/7, their orders are completely secure, and they can browse for the fan that suits their needs and tastes from our huge online inventory."

Eller also points out that contemporary ceiling fans nowadays are not only stylish and elegant, but they are also energy efficient. "A great new technology in today's modern ceiling fans is DC motor technology." He further explains, "DC ceiling fans use about 1/3 the current of the average traditional motor ceiling fans, and on average move more airflow making them about 3 to 4 times more efficient than fans using 120 volt AC motors." Another advantage of DC ceiling fans is that they all come with full function remote controls (or in-wall remotes) with 6 speeds instead of the 3-speed pull chains found on most other ceiling fans. These fans also come complete with built in converters, which allow for easy installation into any standard 120V power source.

The new Modern Fan Outlet online ceiling fan store is a one-stop home decorating experience, but for those shoppers that want a pleasant change of pace from the way most online stores treat their customers, the owners of Modern Fan Outlet encourage them to simply pick up the phone and give them a call. They promise you'll soon become a fan of their fans. About Modern Fan Outlet: Modern Fan Outlet specializes in contemporary ceiling fan styles and designs from the top manufacturers in the industry. The Greensboro, N.C. company operates an online store at [www.modernfanoutlet.com](http://www.modernfanoutlet.com) that features ceiling fans for every taste, style and use. From
