(PRLEAP.COM) Buffalo, NY - Early this week, BidURenergy, Inc. (BUE) announced that its energy consulting service, once limited only to businesses, is now being extended to city, county, state, and federal entities.

Civil administrators' demand for assistance obtaining energy supply rates and favorable contract terms has never been higher. The demand stems from the fact that the traditional Request for Proposal (RFP) process is notoriously overwhelming and can take up to six months for those without the proper experience and training.

BUE's "RFP Handling Service" covers everything from issuing the RFP, thoroughly analyzing the responses, negotiating the supply agreement terms, and presenting the results in an easy to understand format. The firm goes as far as to offer two guarantees: (1) All applicable rules, regulations, and laws will be satisfied by through a competitive bidding process (2) BUE will always act on behalf of the client and specifically not on behalf of any supplier.

About BidURenergy, Inc. - BUE is an electricity and natural gas consulting firm with thousands of clients across the nation, specializing in energy procurement auction administration. The firm's services are available to industrial, commercial, and retail companies. More information is available at www.bidurenergy.com .
