

SAN DIEGO, CA, September 12, 2013 **/24-7PressRelease/** -- HealthCare Anytime, a leading provider of enterprise patient portal technology, announced today that Estes Park Medical Center has selected its enterprise patient portal to help drive patient engagement in their healthcare. Estes Park will implement HealthCare Anytime's web-based solution at its hospital and wholly-owned outpatient clinic, Estes Park Medical Group.

"We are excited to work with Estes Park, a critical-access hospital with the vision of engaging their patients through use of our online portal," said Brady Klick, HealthCare Anytime chief executive officer. "Estes Park leadership clearly sees the value of providing their patients with secure online access to the patients own health information. This will lead to a more informed patient population."

Gary Hall, Vice President of Information Services / CIO at Estes Park, added, "HCA offered the unique solution we were seeking in a patient portal. First, the portal is hosted in the cloud, which reduces the demands on our busy IT staff. Second, HCA can provide our organization with a single solution that integrates with both our MEDITECH inpatient EMR and the Allscripts ambulatory EMR used by our clinic. This is especially convenient for our patients who can go to one website to securely access their health information from our hospital and clinic systems."

About Estes Park Medical Center Located in Estes Park, Colorado, the Estes Park Medical Center is a 23-bed critical-access acute care facility with a 24-hour emergency department, 24-hour ambulance service, emergency air transport, medical/surgical services, obstetrics, home health care, and hospice. Estes Park Medical Group offers family medicine, obstetrics/gynecology, general surgery, pediatrics, and orthopedics.

About HealthCare Anytime HealthCare Anytime's patient engagement solutions give healthcare organizations the ability to help patients achieve meaningful engagement in their own healthcare by providing the tools that enable interactive participation. We deliver robust patient engagement solutions through our enterprise patient portal built on industry standards and with innovative technologies. Hosted in a secure, highly reliable cloud-based environment, our portal applications are offered in a Software-as-a-Service (SaaS) model, which greatly reduces the burden on your IT resources. As a full-service provider we handle hosting, implementation, training and ongoing support. Visit www.healthcareanytime.com and follow us on Twitter, Facebook, LinkedIn and You Tube.
