

DALLAS, TX, September 14, 2013 **/24-7PressRelease/** -- KBI Electrical Services of the Dallas area has completed several commercial cost-saving electrical projects for refrigeration control and energy efficient lighting retrofits. KBI Electrical offers services including new construction electrical installations, upfits and almost any kind of cabling in the Dallas-Fort Worth area including Arlington, Plano, Irving, Frisco, Carrollton, Mesquite and the surrounding towns in Texas.

"We have a great track record of installations with major grocery store chains helping them save money with refrigeration control and more efficient lighting," said Gary Edwards, President of KBI Electrical Services. "We have completed several projects for Tom Thumb and Albertsons."

"With energy efficient lighting and emergency management controlled refrigeration," continued Edwards, "a typical grocery store facility can lower their energy usage by up to 20%."

KBI has licensed electricians that specialize in commercial energy-efficient lighting and large scale electrical supply. KBI also installs fiber optic cables, voice-data cabling, CAT5, and cabling for card access control security systems with CCTV surveillance and monitoring.
