

Monroe Dentist Announces The Availability Of Dental Implants

Written by Australian Business

MONROE, OH, September 14, 2013 **/24-7PressRelease/** -- Dr. Kori of Kori & Everhart Advanced Dentistry has some good news for anyone searching for a quality dentist in Monroe who has an issue with missing teeth and wants a more permanent solution compared to traditional options. She now offers dental implants in Monroe as a more comfortable and effective alternative to dentures.

Dental implants are replacement teeth that are installed not just on the surface of the gum, but beneath the gum like an actual tooth. The implant is placed inside the bone that is already beneath your gums to anchor it in place. Unlike dentures, the implant is independent and doesn't rely on other teeth to hold it in the mouth.

The main advantage of dental implants is that when they're installed the patient does not have to worry about removing and soaking them every night like he would with dentures. Other advantages include a better looking smile, more comfort when eating, better speech and durability. Dental implants are just like regular teeth, so they can be brushed and flossed as usual. With proper dental care, maintenance and regular visits to Dr. Kori, a cosmetic dentist in Monroe, at Kori & Everhart Advanced Dentistry for cleanings, these new "teeth" can last a lifetime.

A better solution - some people don't realize the implications of living with missing teeth. It can affect everything from the shape of the face to the way a person talks. Not to mention, a space can cause the rest of the teeth in the mouth to shift in undesirable ways. The teeth are also crucial to normal digestion-without them our food doesn't get broken down properly.

The traditional solution to this problem was to create full or partial dentures, but some people are ashamed and afraid of wearing these dental appliances because they can fall out and must be removed at night. They also require frequent replacement or adjustment to fit the patient's mouth properly. Dr. Kori understands these concerns and offers dental implants Monroe residents can count on. Interested parties can schedule an appointment at <http://www.eastpointedental.com> for an initial consultation.

"Dental implants are the perfect solution for patients who don't want the aggravation of dentures, but need replacement teeth urgently. I am eager to not only meet but exceed my patient's dental health expectations," said Dr. Kori about Monroe dental implants.
