

## Trustive Announces Major UK Network Expansion Across 15,000 Premium Hotspots

Written by Australian Business

---

LONDON, ENGLAND, September 14, 2013 **/24-7PressRelease/** -- Trustive, a leading international WiFi access provider and No1 in Europe, is pleased to be able to announce another major extension to its international WiFi network with the addition of 15,000 premium UK hotspots. This expansion includes 11,000 bar/restaurants, 2000 shopping centres, 250 outdoor/city-wide locations and many more key sites besides.

Trustive works tirelessly with local operators in order to ensure that only quality locations are incorporated into Trustive's global WiFi footprint and this most recent UK network expansion includes 15,000 premium hotspots that fully support Trustive's highest standards to ensure seamless, secure and high-speed WiFi access for Trustive's community of travellers.

Crucially for travellers, Trustive offers extensive WiFi coverage in 130 countries, mainly focused in Europe, Asia and Latin America with coverage available at premium sites such as airports, hotels, bars and restaurants, travel hubs, convention centers and outdoor / city wide hotspots. Travellers can benefit from seamless access to this premium WiFi network via a range of free "Trustive WiFi" apps for smartphones and tablets (Android and iPhones/iPads) and connection software for laptops (Windows, Macs and Netbooks), which detect and provide seamless connectivity to Trustive WiFi hotspots. All Trustive's connection software is available for free download via Trustive's Download Center.

Full details of Trustive's international WiFi hotspot network (which includes 500,000 premium locations worldwide) are available via Trustive's online hotspot directory:  
<http://www.trustive.com/hotspots/>.

About Trustive Trustive provides travellers with comprehensive WiFi coverage by combining the hotspot locations of more than 80+ leading WiFi operators into one unified, global network of 500,000+ WiFi hotspots in 130 countries and allowing customers to access these locations through a single click.
