

BROOKFIELD, WI, September 14, 2013 **/24-7PressRelease/** -- Concurrency, Inc., the 2012 Microsoft Central Region Partner of the Year, will host two free events for corporate information technology directors to support their strategic planning for infrastructure and platform management, business intelligence, enterprise social media, and mobile device management.

The "**Microsoft Technology Roadmap Event**" will be held Friday, September 20 from 9:00 a.m. to 11:00 a.m. at the Microsoft corporate office in Waukesha, Wisconsin. The event will also be held later the same day, from 2:00 p.m. to 4:00 p.m., at the Crowne Plaza hotel in Madison, Wisconsin. IT managers are invited to visit Concurrency's Events page for additional details and to register: Concurrency.com/events .

At the events, Concurrency consultants will share insights learned from field deployments of Microsoft enterprise applications. Topics will include:

- Mobile device management. See how Windows 8.1 offers a compelling end-user experience and the manageability and security that IT organizations require. In addition, learn how to take advantage of the new unified experiences across PC, phone and tablets.

- Enterprise social media. Find out how to break down organizational and geographical barriers with our integrated suite of social tools, and drive deeper, more impactful engagements with customers and partners.

- Modernize the datacenter and optimize for the cloud. Learn how to take a complex, heterogeneous datacenter into the cloud with a consistent platform and common tools that work across datacenters, service providers and the public cloud. Discover the capacity the cloud offers, while still meeting the requirements for security and compliance, reducing cost and complexity in areas like storage and networking, and delivering services to the business faster.

- Data-driven decisions. Improve decision-making with easier access to data. Empower your end users with powerful and familiar tools while making BI engaging and fun. Learn how to create a complete data platform that connects data across the cloud and devices.

About ConcurrencyFounded in 1989, Concurrency, Inc. provides expert guidance to plan and deploy IT solutions that increase business productivity. Concurrency architects and integrates

across all five Microsoft enterprise platforms: SharePoint, System Center, Lync, Exchange, and Dynamics CRM, both on-premises and in the cloud. Concurrency's cloud expertise includes Office 365 and Azure.
