

LONDON, ENGLAND, September 14, 2013 **/24-7PressRelease/** -- Primeur today announced its Spazio MFT/S Adapter has achieved SAP certification as powered by the SAP NetWeaver technology platform. The solution has been proven to integrate with SAP solutions, providing bi-directional multi-protocol file transfer for SAP NetWeaver PI implementing both Server and Client file transfer functionality.

The SAP Integration and Certification Center has certified that Spazio MFT/S Adapter integrates with the SAP NetWeaver Process Integration (SAP NetWeaver PI) offering. It enables files to be transferred without the need to stage files to and from disk. SAP customers can also enjoy a greater degree of control over data transfers with increased performance, security and auditability.

"Existing customers of Spazio MFT/S Adapter are delighted that the solution they chose is now certified as powered by SAP NetWeaver", said Stefano Musso, Executive VP at Primeur. "It reinforces their decision in choosing a world class secure managed file transfer product, Spazio MFT/S, to move their business critical data in and out of their core SAP applications. Many more of our customers use SAP and we are sure that this announcement will give them greater confidence in making further investments in both SAP and Spazio MFT/S"

As a result of the certified integration, Spazio MFT/S Adapter makes managed file transfer in SAP, even faster and more secure, underpinning rapidly changing business needs. It has been designed to meet all levels of security and deals effectively with ever more stringent regulatory and compliance requirements. A continued investment in its development means that it is also fully compliant with the latest industry standards such as PKI, PKCS, X509, LDAP Integration and with Authentication, Authorization, & Audit.

Primeur collaborated with SAP specialist GreenSharp to develop the adapter which has been specifically designed to meet clients' precise needs at a time when businesses progressively require the need to manage file transfers more securely and in increasingly diverse IT environments.

### About GreenSharp

GreenSharp is a close-knit team of consultants, developers, architects and project managers, with strong skills in SAP systems as well as the functional skills and techniques necessary to design and implement smart IT solutions for both SMB and large international companies. We

aim to combine quality advice with an ethical approach, thus achieving environmental and economical sustainability for our customers. In this way we provide high-profile IT solutions that ensure dynamic governance for our customers' business processes. We handle IT projects with ambition and solidity by leveraging proven functional knowledge combined with technologies based on SAP NetWeaver, JQuery Mobile HTML5, iOS and Android, among others. The positive feedback received over the years confirms our choice of strategy and it is a source of great pride to us that we are considered an important point of reference for SAP users in Italy and Europe.
