

## Paradigm Imaging Group Announces Release of Twain Driver for Colortrac SC Series

Written by Australian Business

---

COSTA MESA, CA, September 15, 2013 **/24-7PressRelease/** -- The Colortrac SmartWorks SC TWAIN driver provides a simple way to directly control a SmartLF SC wide format scanner from inside applications that are compatible with the TWAIN 1.5 standard and other software that supports TWAIN connected scanners. Customers can now scan their originals, select paper size or scanned image resolutions without interrupting their workflow. SmartWorks SC TWAIN is one of the most powerful plug-in tools available for today's popular graphic applications. This tool is useful in industry segments such as Reprographics, Graphic Arts, and Desktop Publishing, to name a few.

Says Randy Geesman, president of Paradigm Imaging Group, "The TWAIN driver is a significant development for the SmartLF SC series scanners, and proof that Colortrac is cognizant of the demands of the wide format imaging community."

SmartWorks SC TWAIN installs itself as a TWAIN plug-in module, which is automatically recognized when an application supporting TWAIN starts.

Existing users of Colortrac SmartLF SC scanners can receive the SmartWorks SC TWAIN software drivers FREE when downloading an upgrade of the SC Utilities v1.0.26 software. For new owners of Colortrac SmartLF SC wide format scanners, the TWAIN driver is included as standard in the box.

About Paradigm Imaging Group:Paradigm Imaging Group is a large format solutions provider whose expertise extends from scanning and printing products to imaging systems integration, software development and product distribution. Paradigm counts among its clients companies in reprographics, architecture, engineering, construction and manufacturing, as well as numerous public agencies at all levels of government. Since 1989, Paradigm has grown to become a leading provider of large format scanning and printing solutions.

About Colortrac:Founded in 1989 and based in St Ives, Cambridgeshire, UK, a region of British excellence in science and technology, Colortrac Ltd is the leading innovator in professional wide format color scanners and image acquisition software solutions. They are creating unique solutions to simplify scanning challenges across the full spectrum of applications, ranging from Graphic Arts to CAD, GIS, EDM and FM technical document scanning. Colortrac Ltd has offices in Beijing and Suzhou, P.R. China, in Chantilly, Virginia, USA and in Yokohama, Japan.
